Christine was born in Jakarta, Indonesia. She received her Bachelor in Computer Science from the Bina Nusantara University. She then moved to Singapore in 2005. Her passion for Artificial Intelligence led her to pursue her Masters of Technology in Knowledge Engineering from the National University of Singapore.

Prior to joining Cognitive Edge, Christine had many experiences working with J2EE and Java technologies and has gained that experience working with companies such as CrimsonLogic, Robert J Steiner, and PT Virtual Map Indonesia.

Previous projects she has managed include License Plate Image Recognition, Document Post Translation Processing using N-Gram Method, and the Open Source Knowledge Management Portal Initiative. She has also taken part in development and support of various products such as Rule Engine and Business Process Products, an Enterprise Billing Application, and a Credit Card Payment Gateway.

In her free time, she enjoys listening to music, playing her guitar, playing basketball, and occasionally playing simulator or RPG computer games.

Christine joined Cognitive Edge in May 2011 as a Systems Engineer / Developer. She will be focusing on the core areas of the framework as well as working on the front end for the SenseMaker® Explorer and Wanderer tools.
