Reshu has completed her Masters in Computer Application from India in 2009. She has also completed a diploma and advanced diploma in programming languages such as C, C++, Java and Visual FoxPro. She holds a national level top position in data structuring using C language.

She moved to Singapore in 2009 and her passion for learning a variety of different languages motivated her to obtain Sun's certification in Java and Web Component development.

Reshu has previously worked on projects on payroll systems, gas retail and distribution and business automation. She has also been involved in a web-based project for a Singaporean company prior to joining Cognitive Edge.

She currently works as a Software Engineer in Cognitive Edge Singapore and is focusing on SenseMaker® Collector.
